PROFESSIONAL SUMMARY

Software Engineer experienced in building and launching responsive web and cross-platform mobile products using React, Next.js, TypeScript, React Native, and Flutter. Skilled in authentication, real-time communication, API integrations, deployment, and production troubleshooting. Product-focused, with a strong ability to translate business requirements into reliable, user-friendly digital experiences.

CORE COMPETENCIES

- **Frontend Development:** React, Next.js, TypeScript, JavaScript, Tailwind CSS, HTML, CSS, responsive design, accessibility, and reusable UI systems.
- **Mobile Development:** React Native, Flutter, Expo, real-time call flows, native integrations, app performance, and release readiness.
- **Backend & Integrations:** Node.js, REST APIs, Supabase, Firebase, authentication, email automation, and third-party integrations.
- **Product Engineering:** Building user-focused web and mobile products from idea to launch while aligning features with user and business goals.
- **Delivery & Collaboration:** Debugging, Git, deployment, App Store release support, stakeholder communication, and product-focused problem solving.

PROFESSIONAL EXPERIENCE

Mastaskillz — Frontend Developer

Dec. 2025 – Present

- Improved the platform's user journey by delivering frontend features for authentication, onboarding, job search, pagination, and job details.
- Built administrator dashboard features that improved visibility into user activity and key platform operations.
- Resolved frontend and API integration issues and collaborated with the team to ship more stable product updates.
